 - C#, SQL, Python, SQL, SSMS, Git, TFS, TeamCity, Redgate.
- TechSolve (3 semesters)
 - Developed new software for communicating with manufacturing equipment using C++ and C#.
 - Maintained existing software through bug fixes and new feature implementations.
 - Skills:
 - C++, C#, VMs, Docker, Git, Jira, Confluence.

Project Sought:

I have already found two other group members to work on a project that utilizes Spotify's API to match people based on their music tastes and create a playlist of the matched accounts' shared liked songs.
